DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 9, 11, 15-21, drawn to a collimating lens, classified in class 359, subclass 641.
- II. Claims 6-8 and 12-14, drawn to an optical scanning apparatus, classified in class 359, subclass 206.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combination does not rely on the details of the subcombination (see claims 15 and 21 of the subcombination and evidence claim 6 and 14 of the combination). The subcombination has separate utility such as a collimating lens for a beam steering device or has utility by itself.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the fields of search are not coextensive, restriction for examination purposes as indicated is proper.
